(54) SYSTEM OR METHOD FOR IMAGE DISTRIBUTION, OR RECORDING MEDIUM THEREOF

each image for the interior that has been dist sequentially from the system server 1 to a sp window device.

(57) Abstract:

COPYRIGHT: (C)2002,JPO

PROBLEM TO BE SOLVED: To sequentially distribute only a fresh image which is matched with taste of the user and not distributed in the past according to the agreement contents of a contract for utilizing distribution services when an image for the interior having a high hobby property is distributed by way of a network.

SOLUTION: A system server 1 memorizes and manages the contract contents for every user having the contract for utilizing the distribution services. When each image for the interior for each contract user is sequentially selected from background image file groups and distributed to a home server 2 automatically, the image for the interior that is not distributed in the past is distributed preferentially. The home server 2 displays
